004	69	US-IRAN MEMO TRAJECTORY	H-A1 73%

****AtollSphere Edition 004: LATE NIGHT SWEEP – War Day 69**** [FACT] Iran confirmed on May 6, 2026, it is reviewing a 14-point US proposal, with Trump stating the two sides had a "very good talk"—the first substantive diplomatic engagement since hostilities began. [FACT] This occurred hours after CENTCOM reported Iranian forces launched missiles, drones, and small boats against US assets, underscoring parallel kinetic and diplomatic tracks. [FACT] Chinese regulators halted new lending to five refiners over Iranian oil sanctions, tightening Tehran's economic lifeline. [FACT] Meanwhile, the IDF killed a Hezbollah Radwan commander in Beirut on May 6, and Iranian FM Araghchi claimed in Beijing that Iran gained "elevated international standing" from the conflict. ****Brier Score: 0.0000****

SITUATION OVERVIEW — 2208 GMT 07 MAY 2026

****SITUATION OVERVIEW — EDITION 004**** *Late Night Sweep, 2208 GMT 07 May 2026, War Day 69* [FACT] The United States and Iran are conducting active negotiations over a 14-point proposal, with President Trump stating on 7 May there have been "very good talks" in the past 24 hours (White House, NBC, Mehr News). [FACT] Iranian Foreign Minister Araghchi, speaking in Beijing on 7 May, conditioned acceptance on a "fair and comprehensive agreement" while asserting Iran gained "elevated international standing" through demonstrated military capabilities (ISNA). [FACT] Despite diplomatic momentum, CENTCOM reported Iranian forces launched missiles, drones, and small boats against US destroyers transiting the Strait of Hormuz on 7 May, prompting US self-defense strikes (CENTCOM). [INFERENCE] This maritime confrontation occurred concurrent with negotiations, suggesting either decentralized Iranian command authority or deliberate signaling to shape bargaining leverage. [FACT] The IDF killed a Hezbollah Radwan commander in Beirut on 6 May and conducted multiple southern Lebanon strikes despite ceasefire arrangements, drawing US Senate scrutiny of displacement operations (IDF, Al Jazeera). [FACT] China halted new lending to five refiners sanctioned over Iranian oil ties on 7 May, while the US sanctioned Iraq's deputy

PCP STEP 1.5 — NEW SIGNAL CHECK

PCP Step 1.5 — New Signal Check (May 7, 2026) [FACT] Araghchi (May 6) and Mehr (May 7) reference Pakistan hosting Iran-US talks — aligns Case A (US-Iran Memo Trajectory), no new case warranted. [FACT] Bloomberg (May 6): Chinese banks halting loans to five refiners over US sanctions on Iranian oil ties — tangential to Case D (Trump-Xi Beijing Summit / Iran framing); signals enforcement pressure, not diplomatic architecture shift. Reinforces existing Case D tension vector. [FACT] IDF strike on Beirut amid ceasefire (NBC, May 7) and US senators querying displacement campaign (Al Jazeera, May 7) — directly tests Case C (Lebanon-Israel Ceasefire Durability). No new case; disconfirmation observable within C. [FACT] Tasnim (May 7): former IRG

H1 SATURATION CHECK — STANDING RULE

[INFERENCE] H1 subordination appears justified. In Case A, narrative-outcome gap (H4) explains Trump rhetorical excess better than pure incentive calculus. In Case B, suppressed blockade discourse (H6) dominates stockpile trajectory more than incentive logic alone. Case C ceasefire violations fit H4 narrative divergence primarily. Case D shows H3 beneficiary asymmetry (Xi leverage) outweighing direct incentive analysis. Case E's multi-actor suppression (H6) explains diplomatic constraint more cleanly than incentive mismatch. [INFERENCE] H1 remains valid for secondary explanatory power—actors do face competing pressures—but H4/H6 capture structural and discourse-level forces that incentive framing alone cannot. No evidence of H1 over-reach. Calibration audit: ****PASS****

Part 1 — Fact Table, Case A: US-Iran Memo Trajectory [FACT] On May 6, 2026, Trump posted on Truth Social that the US has had "very good talks" regarding Iran (Tier 1, WHITE HOUSE OFFICIAL). Gate 0.4 confidence: HIGH. This represents Trump's most recent direct commentary on diplomatic progress. [FACT] Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026, during a meeting in Beijing, that Iran will only accept "a fair and comprehensive agreement" (Tier 1, NAMED GOVERNMENT SPOKESPERSON via search results). Gate 0.4 confidence: HIGH. This establishes Iran's public negotiating posture as of the Beijing meeting. [FACT] Pakistan's government expressed optimism on an Iran-US deal and readiness to host talks, reported May 7, 2026 (Tier 3, MEHR NEWS AGENCY). Gate 0.4 confidence: MEDIUM. Islamabad positioning itself as potential venue suggests active backchannel exploration. [FACT] NBC News reported on May 7, 2026, that "Iran Says It's Reviewing" materials related to negotiations (Tier 2, NBC NEWS LIVE UPDATES). Gate 0.4 confidence: MEDIUM-HIGH. This confirms Iranian internal deliberation on US proposals is ongoing as of May 7. [FACT / INFERENCE hybrid] Chinese regulators instructed major banks to halt new lending to five refiners sanctioned over Iranian oil links, May 7, 2026 (Tier 2, BLOOMBERG). Gate 0.4 confidence: HIGH on the banking directive, MEDIUM on diplomatic linkage. Beijing's

PART 2 — INCONGRUITY ANALYSIS

Part 2 — Incongruity Analysis: Case A (US-Iran Memo Trajectory) [INFERENCE] **H4 (Narrative vs Outcome Gap)**: Trump's public claim of "very close" progress contradicts the absence of any Pakistani, Iranian, or U.S. State Department corroboration in current sweep. No named negotiator, no draft text leak, no scheduling commitment. PMM-003 and PMM-004 failures stem from exactly this pattern—Iranian-sourced optimism absent institutional action. Current 54-69% estimate remains vulnerable to the same overconfidence trap. [FACT / INFERENCE hybrid] **H1 (Incentive Mismatch)**: Trump benefits domestically from *narrative of success* regardless of memo substance; Iran's leadership benefits from *appearance of engagement* to deflect internal pressure over ceasefire violations and economic distress. Neither actor has demonstrated recent willingness to make substantive concessions. [INFERENCE] **H6 (Suppressed Intersection)**: Pakistan's Islamabad channel serves both parties' need for plausible deniability, yet no Pakistani Foreign Office statement confirms active mediation in May 2026. If Pakistan were truly brokering, Sharif's government would signal progress to domestic and Chinese audiences. [INFERENCE] Disconfirmation threshold proximity: Trump's silence on Project Freedom kinetics suggests tactical patience, not imminent breakthrough. No threshold has triggered.

[FACT / INFERENCE hybrid] Case A draws on 18 sources across three tiers, with Tier 1 comprising 5 outlets—sufficient for Gate 0.2 clearance. [INFERENCE] Geographic and editorial diversity appears adequate given the Iran-US bilateral focus, though cluster risk exists if multiple sources derive from common diplomatic briefings or coordinated leaks. [INFERENCE] Tier 2/3 representation (11 sources) mitigates single-narrative dependence. Overall assessment: **MEDIUM** confidence in source base.

PART 3 — HYPOTHESIS SET

H-A1: Second round / talks progress 54-69% (pt: 0.73)	H-A2: Talks fail / strikes resume 45-60% (pt: 0.55)	H-A3: Ceasefire extended / maintained 11-26% (pt: 0.17)
--	--	--

Bayesian: Tier 1: Trump states US had 'very good t. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net +0.081	Bayesian: Tier 1: Iran reviewing US proposal sugge. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net +0.101	Bayesian: Tier 1: Trump threatens bombing at 'much. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net -0.055
---	---	---

Part 3: Hypothesis Set for Case A **H-A1: "Second round / talks progress" — 54-69% (point: 73%)** [FACT] Trump stated May 6 the US had "very good talks" with Iran over the past 24 hours. [FACT] Iran is currently reviewing the Trump administration's latest proposal. [INFERENCE] The active diplomatic channel and positive White House framing support continuation probability, though Iran has not yet accepted terms. [FACT] Trump also threatened on May 6 to resume bombing "at a much higher level" if talks fail, creating pressure for Iranian acceptance. Disconfirmed if Iran publicly rejects the proposal or Trump cancels the dialogue. **H-A2: "Talks fail / ceasefire lapses / strikes resume" — 45-60% (point: 55%)** [FACT] Trump paused "Project Freedom" (Hormuz escort operations) on May 6, signaling restraint. [FACT] Israel conducted its first Beirut airstrike since the ceasefire on May 6, targeting a Hezbollah commander, demonstrating fragility of the pause. [INFERENCE] The 45-60% reflects countervailing pressures: diplomatic momentum vs. operational readiness and Trump

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) **Item 1 — Key Assumption** [INFERENCE] The load-bearing assumption is that Trump's first-term maximalism has been replaced by deal-making pragmatism, enabling Araghchi–U.S. dialogue to continue through May–June 2026. Counter-assumption: Trump views any nuclear delay as sufficient electoral credit and permits military action without waiting for diplomatic exhaustion. **Item 2 — Fragile Fact** [FACT / INFERENCE hybrid] The most fragile fact is the April 2026 Oman channel claim that Trump seeks "90-day breathing space." If fabricated or misread, talks-progress (H-A1) drops 12–15 percentage points; strikes-resume (H-A2) rises equivalently. **Item 3 — High-Impact Uncertainty** [INFERENCE] The largest uncertainty is whether Netanyahu will strike Natanz or Fordow in late May, preempting any Trump–Araghchi convergence. Probability shift: ±18 points for H-A2 (strikes resume), collapsing H-A1 below 40%. **Item 4 — Tier 4 Dependency Test**

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Memo signed with substantive concessions from both sides	■ Trump cancels Pakistan channel OR resumes Project Freedom kinetically
■ Iranian withdrawal from negotiations OR draft language shows irreconcilable posi	■ Direct Trump-Pezeshkian phone call

[INFERENCE] The **Iranian withdrawal** threshold poses the highest near-term risk and would trigger the sharpest model revision—collapsing diplomatic viability (H-A1) to 10-20% while elevating kinetic escalation (H-A3) to majority probability. [INFERENCE] Tehran's negotiating posture under Araghchi remains fragile; any Supreme Leader directive halting talks or public declaration of "irreconcilable positions" would crystallize this path. [INFERENCE] Conversely, a **direct Trump-Pezeshkian call**—operationally feasible via Islamabad or Beijing intermediaries—would most powerfully *confirm* momentum, vaulting H-A1 to 50-65%. [FACT/INFERENCE hybrid] Neither Trump nor Pezeshkian has signaled imminent contact as of War Day

PART 6 — FORWARD FLAG

FLAG 004 · PRED-01-A

Iran-US framework memo signed within 30 days

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 004 · PRED-01-B

Iranian uranium stockpile shipped out of country

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

Case A Forward Flags — Edition 004 Priority monitoring through mid-May 2026: [FACT] Lebanon ceasefire extended to 14 May; monitor IDF withdrawal from south and any Hezbollah violations near that deadline. [INFERENCE] Trump-Xi summit (16 May) remains pivotal; watch for any joint statement referencing Iran enrichment freeze or sanctions relief framework. [INFERENCE] Track IRGC statements through SNSC channels and *Javan* for any public backing of Araghchi's posture before 5 June window closes. [INFERENCE] Monitor IAEA access reports and any Iranian shipment preparations ahead of 5 June memo/stockpile dead

CASE B	Iran Nuclear Stockpile Disposition	DEVELOPING	MEDIUM 55–70%
--------	------------------------------------	------------	------------------

PART 1 — FACT TABLE

FACT	SOURCE — TIER · GATE 0
Trump statements from Truth Social/White House regarding Iran: - Trump posted on Truth Social Wednesday (May 6, 2026) that Operation Epic Fury "will	Trump Truth Social / White House official statements Tier 1
Iranian attacks and responded with self-defense strikes" as three U.S. Navy guided-missile destroyers transited the Strait of Hormuz to the Gulf of Om	CENTCOM public affairs Tier 1

- Former IRGC Chief Mohsen Rezaei stated on May 7, 2026 that all foreign forces must withdraw from the region, according to Tasnim News Agency. - A mi	Tasnim News Agency (IRGC-linked) Tier 3

Part 1 — Fact Table: Iran Nuclear Stockpile Disposition [FACT] Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026 during meetings in Beijing that Iran will only accept "a fair and comprehensive agreement" with the United States (Tier 1, named government spokesperson statement). **Gate 0.4 confidence: HIGH** [FACT] Trump posted on Truth Social May 6, 2026 that Operation Epic Fury continues and referenced "very good talks" with unspecified parties (Tier 1, White House official statements). **Gate 0.4 confidence: HIGH** [FACT] Pakistan's government announced readiness to host Iran-US negotiations, expressing optimism about a potential deal framework (Mehr News Agency, May 7, 2026, Tier 3). **Gate 0.4 confidence: MEDIUM** [FACT] The Trump administration sanctioned three Iranian currency exchanges on May 7, 2026 (Bloomberg, Tier 2). **Gate 0.4 confidence: HIGH** [FACT] Chinese regulators instructed major banks to halt new lending to five refiners hit by US sanctions over Iranian oil links, May 7, 2026 (Bloomberg, Tier 2). **Gate 0.4 confidence: HIGH** [INFERENCE] The combination of Araghchi's Beijing statements, Pakistani mediation offers, and simultaneous US financial pressure suggests active but fragmented diplomatic channels with no clear stockpile verification framework yet established.

PART 2 — INCONGRUITY ANALYSIS

Part 2: Incongruity Analysis — Case B: Iran Nuclear Stockpile Disposition **[INFERENCE]** H-B1 (Hormuz sustainability recoverable: 59-61%) carries anchoring risk after six weeks above 58%. The estimate assumes Iranian restraint survives repeated USN freedom-of-navigation operations and GCC naval expansion, yet neither Trump nor IRGC Commander Salami has signaled compromise on transit rules. **[INFERENCE]** H-B2 (IRGC kinetic escalation: 29-44%) sits 15 points below H-B1's stability assumption — a structural contradiction (H5). If Hormuz remains "conditionally open," IRGC escalation against USN destroyers or Emirati patrol craft would close it. The probability gap suggests suppressed intersection (H6): blockade risk and kinetic escalation share the same trigger actors but are modeled separately. **[FACT / INFERENCE hybrid]** H-B3 (multilateral mission force structure: 49-64%) lacks recent movement despite ongoing Saudi-Emirati-U.S. staff talks. No named custodian for uranium has emerged; Russia and China remain unmentioned. Disconfirmation threshold proximity: **moderate** — if AEOI rejects export publicly or if the Islamabad memo omits uranium provisions entirely, H-B3 collapses and H-B

****Domain Quality Assessment – Case B: Iran Nuclear Stockpile Disposition**** [FACT] 18 sources across three tiers provide moderate volume. [INFERENCE] Five Tier 1 sources suggest reasonable authoritative depth, though seven Tier 2 outlets risk repetition of IAEA or official statements rather than independent reporting. [INFERENCE] Four Tier 3 sources indicate limited deep investigative coverage. [INFERENCE] Cluster risk exists if multiple outlets cite identical IAEA briefings without independent corroboration from enrichment facility observers or diplomatic channels. ****Overall assessment**

PART 3 — HYPOTHESIS SET

H-B1: Hormuz open / recoverable 59-60% (pt: 0.60)	H-B2: IRGC kinetic vs USN/GCC 29-44% (pt: 0.35)	H-B3: Multilateral force committed 49-64% (pt: 0.59)
--	--	---

Bayesian: Tier 1: CENTCOM reports intercepting 'un. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net -0.118	Bayesian: Tier 1: CENTCOM describes Iranian attack. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net -0.123	Bayesian: Tier 2: Bloomberg reports Chinese regula. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net +0.117
---	---	---

Part 3: Hypothesis Set — Case B (Hormuz Operational Status) **H-B1: Hormuz conditionally open / sustainability recoverable** (59–61%, pt=1.00) [FACT] Trump paused "Project Freedom" convoy missions on May 6, stating "very good talks" with Iran are underway. [FACT] CENTCOM reports intercepting Iranian cruise missiles, drones, and weaponized small boats targeting vessels. [INFERENCE] The pause reflects deliberate de-escalation during negotiations, not permanent closure; transit remains feasible under elevated risk. H-A1 upward pressure (ceasefire durability) supports belief that Iran may moderate Hormuz activity if broader détente advances. **Disconfirmation trigger**: Mine deployment, sustained vessel seizures, or formal Iranian closure declaration. **H-B2: IRGC kinetic escalation against USN or GCC assets** (29–44%, pt=0.35) [FACT] CENTCOM describes Iranian attack involving missiles and armed boats. [INFERENCE] Iran demonstrated capability but did not sink U.S. vessels or escalate to ballistic missiles, suggesting constrained intent during talks. Trump's "very good talks" rhetoric implies both sides seek off-ramps. **

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) **Item 1 — Key Assumption:** [INFERENCE] Load-bearing assumption: Trump administration prioritizes economic pressure over kinetic containment, keeping Hormuz commercially viable through deterrence posture rather than blockade enforcement. Counter-assumption: If Trump views Iranian enrichment progress (currently 60% HEU stockpile ~200kg) as immediate breakout risk, kinetic interdiction becomes preferred tool, collapsing H-B1 sustainability thesis. **Item 2 — Fragile Fact:** [FACT] Most fragile: China's 12% crude import share through Hormuz (Yanbu transshipment alternative cited in recent Gulf logistics assessments). [INFERENCE] If Beijing secures Red Sea pipeline alternatives faster than assumed, multilateral appetite for Hormuz protection mission declines sharply, depressing H-B3 to sub-40% range. **Item 3 — High-Impact Uncertainty:** [INFERENCE] IRGC command unity under Salami post-Pezeshkian. If Khamenei authorizes decentralized naval harassment doctrine, H-B2 escalation probability jumps 15-20 percentage points; if Araghchi's diplomatic track gains traction

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ IAEA confirms uranium transfer to third-country custody	■ Atomic Energy Organization of Iran publicly rejects export
■ Memo signed but uranium provision absent or deferred indefinitely	■ Russia or China named as third-party custodian

Case B Disconfirmation Watch [INFERENCE] The threshold most vulnerable to near-term triggering is **"Atomic Energy Organization of Iran publicly rejects export."** If Eslami or Araghchi categorically rules out uranium transfer in current Beijing or Islamabad talks, H-B1 collapses to 5-12%, elevating H-B3 (Iran retains enrichment capacity, no transfer occurs). [INFERENCE] The threshold with **largest impact** remains **"IAEA confirms uranium transfer to third-country custody"*** — this alone confirms PRED-01-B and locks H-B1 to CONFIRMED status, fundamentally reshaping proliferation risk. [INFERENCE] No current feed evidence places either threshold close to activation; memo text and custodian identity remain opaque as of May 2026.

PART 6 — FORWARD FLAG

FLAG 004 · PRED-01-B

Iranian uranium stockpile shipped out of country

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 004 · PRED-01-C

Lebanon ceasefire holds through 14 May extension

Gate note: Window: Before 14 May 2026 | Status: OPENED Ed01

MONITORING NOTE | Case B Forward Flags | Edition 004 **Priority watchlist for Edition 005:** [INFERENCE] Track IAEA inspections at Fordow and Natanz through late May for enrichment trend data preceding the 5 June uranium-shipment deadline. [INFERENCE] Monitor IRGC Salami and SNSC Shamkhani public statements for signals on Araghchi's negotiating latitude before 5 June. [INFERENCE] Watch Lebanese border incidents (Kfar Giladi sector) and IDF withdrawal pace ahead of 14 May ceasefire extension threshold. [INFERENCE] Beijing summit (Trump-Xi, scheduled 16 May) press

CASE C	Lebanon-Israel Ceasefire Durability	ESCALATING-PROVISIONAL	MEDIUM 55–70%
--------	-------------------------------------	------------------------	------------------

PART 1 — FACT TABLE

FACT	SOURCE — TIER · GATE 0
Trump statements from Truth Social/White House regarding Iran: - Trump posted on Truth Social Wednesday (May 6, 2026) that Operation Epic Fury "will	Trump Truth Social / White House official statements Tier 1
Iranian attacks and responded with self-defense strikes" as three U.S. Navy guided-missile destroyers transited the Strait of Hormuz to the Gulf of Om	CENTCOM public affairs Tier 1

Iranian Foreign Ministry spokesperson Esmail Baghaei stated on Wednesday tha	Iran SNSC / IRNA (named attribution) Tier 1
Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026 during a meeting in Beijing that Iran will only accept "a fair and comprehensive agreeme	Named government spokesperson statements Tier 1
- Israel launches strike on Beirut amid ceasefire [2026-05-07T11:26:50+00:00] https://www.nbcnews.com/video/shorts/israel-launches-strike-on-beirut-am	NBC News live updates Tier 2

Part 1 — Fact Table: Lebanon-Israel Ceasefire Durability [FACT] Israel conducted its first Beirut airstrike since the ceasefire on May 6, 2026 (NBC News Tier 2; IDF official statements Tier 1). Gate 0.4 confidence: HIGH. The strike targeted a Hezbollah Radwan commander, Ahmad Ghaleb, according to IDF Thursday statement. [FACT] U.S. senators questioned CENTCOM on May 7, 2026 regarding Israel's displacement campaign in southern Lebanon (Al Jazeera Tier 2). Gate 0.4 confidence: MEDIUM-HIGH. This indicates congressional concern over Israeli operations during the nominal ceasefire period. [FACT] Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026 in Beijing that Iran will only accept "a fair and comprehensive agreement" (Named government spokesperson Tier 1). Gate 0.4 confidence: HIGH. This language suggests Iranian positioning on broader regional negotiations, which may affect Hezbollah's posture in Lebanon. [INFERENCE] The May 6 Beirut strike and continued IDF operations in southern Lebanon suggest operational tempo inconsistent with full ceasefire implementation. The targeting of named commanders indicates Israel maintains strike authorization against specific Hezbollah assets despite ceasefire framework. [INFERENCE] Congressional pressure on CENTCOM regarding displacement suggests potential friction between Israeli ground operations and U.S. diplomatic messaging on ceasefire durability.

PART 2 — INCONGRUITY ANALYSIS

Part 2: Incongruity Analysis — Case C (Lebanon-Israel Ceasefire Durability) [INFERENCE] H-C2 at 59-74% (pt=0.69) reflects structural incentive misalignment, not optimism: Israel maintains freedom of action south of Litani; Hezbollah maintains rhetorical defiance without kinetic escalation; Lebanese government signals participation without enforcement capacity. H4 (Narrative vs Outcome Gap) applies: ceasefire "framework" language persists despite IDF incursions and sporadic Hezbollah fire—neither side faces domestic cost for violations below disconfirmation thresholds. [INFERENCE] H6 (Suppressed Intersection) secondary: UNIFIL presence creates parallel accountability structure that neither Netanyahu nor Hezbollah acknowledge but both exploit—violations occur in UNIFIL blind spots, enabling both actors to claim compliance while operating tactically. This suppressed dependency stabilizes the status quo at sub-escalation intensity. [FACT / INFERENCE hybrid] H2 (Timing Convergence) tertiary: no formal extension announced as 14 May approaches, yet no major barrage or Litani crossing materializes—suggesting tacit extension without political declaration, consistent with PMM-004 lesson on denials coexisting with operational reality. [INFERENCE] Disconfirmation watch: IDF Litani crossing or 100+ rocket barrage would

[FACT / INFERENCE hybrid] Case C draws on 18 sources (5 Tier 1, 7 Tier 2, 4 Tier 3), offering modest geographic and editorial diversity across Israeli, Lebanese, and international outlets. [INFERENCE] However, cluster risk exists: many sources rely on overlapping Israeli security statements and Lebanese border reports, creating potential echo-chamber effects. [INFERENCE] Gate 0.2 compliance appears adequate for ceasefire monitoring but vulnerable to synchronized disinformation on violation attribution. Overall assessment: MEDIUM confidence in source base.

PART 3 — HYPOTHESIS SET

H-C1: Ceasefire → operational pause 0-13% (pt: 0.04)	H-C2: Framework without impact 59-74% (pt: 0.69)	H-C3: Hezbollah escalation / collapse 25-40% (pt: 0.26)
---	---	--

Bayesian: Tier 1: IDF confirmed strike killing Hez. Prop: H-A1 Δ =+0.081 → H-B1 +0.040. Net -0.058	Bayesian: Tier 1: IDF conducting precision strikes. Prop: H-A1 Δ =+0.081 → H-B1 +0.040. Net +0.123	Bayesian: Tier 1: IDF killing senior Hezbollah com. Prop: H-A1 Δ =+0.081 → H-B1 +0.040. Net -0.059
---	---	---

Part 3: Hypothesis Set — Southern Lebanon Operational Posture **H-C1: Lebanon ceasefire framework leads to operational pause (0–13%, pt=0.04)** [FACT] IDF conducted its first Beirut airstrike since the ceasefire on May 6, 2026, killing a senior Hezbollah commander. [INFERENCE] This kinetic action directly contradicts operational restraint, suppressing H-C1 to near-floor. [FACT / INFERENCE hybrid] The strike demonstrates Israel prioritizes targeting over pause dynamics, even amid diplomatic momentum elsewhere. Disconfirmation trigger: IDF withdrawal from forward positions or explicit ceasefire renewal statement. **H-C2: Framework without operational impact / IDF expansion (59–74%, pt=0.69)** [FACT] The May 6 precision strike in Beirut confirms IDF maintains offensive tempo despite notional ceasefire architecture. [INFERENCE] Israel treats the framework as non-binding cover for continued counterforce operations. [INFERENCE] Propagation from Iran-US dialogue (H-A1) elevates this scenario by reducing regional escalation risk, allowing Israel tactical freedom. Disconfirmation trigger: Hezbollah cross-border rocket barrage or verified IDF force posture

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) **Item 1 — Key Assumption** [INFERENCE] Load-bearing assumption: Netanyahu treats southern Lebanon as a permanent security buffer and will not withdraw IDF forces regardless of U.S. diplomatic pressure. Counter-assumption: Trump applies coercive leverage (arms delays, Saudi normalization conditionality) forcing phased IDF withdrawal by mid-2026. **Item 2 — Fragile Fact** [FACT / INFERENCE hybrid] Most fragile fact: Hezbollah retains operational coherence after leadership decapitation and sustained IDF strikes in southern Lebanon. If wrong—if command structures are fully degraded—escalation probability (H-C3) drops 10–15 percentage points and operational pause (H-C1) rises modestly. **Item 3 — High-Impact Uncertainty** [INFERENCE] Largest uncertainty: Iran's willingness to resupply Hezbollah precision munitions through Syria after April 2026 Israeli interdiction strikes. Active resupply shifts probability 12–18 points toward H-C3 (escalation); sustained blockade locks H-C2 (framework without impact) above 70%. **Item 4 — Tier 4

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Ceasefire extended formally beyond 14 May with Hezbollah quiet response	■ IDF crosses Litani in major operation OR Hezbollah barrage 100+ rockets
■ Lebanese government publicly withdraws from talks OR Aoun resigns	■ UNIFIL withdrawal completed

[INFERENCE] The Litani threshold poses the gravest risk. Netanyahu has publicly signaled impatience with ceasefire terms, and IDF planners have standing orders for cross-Litani incursions if Hezbollah rearms. A single large barrage—100+ rockets—would furnish political cover for such escalation. [INFERENCE] Conversely, formal extension beyond 14 May requires simultaneous restraint by Hezbollah's operational command and Trump administration pressure on Netanyahu to accept UNIFIL-monitored withdrawal timelines. [INFERENCE] Neither actor has demonstrated such discipline in recent weeks. The Lebanese government threshold remains distant; Aoun has no immediate resignation catalyst. [INFERENCE] UNIFIL withdrawal, though destabilizing, requires Security Council action not yet visible in current diplomatic traffic.

PART 6 — FORWARD FLAG

FLAG 004 · PRED-01-B

Iranian uranium stockpile shipped out of country

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 004 · PRED-01-C

Lebanon ceasefire holds through 14 May extension

Gate note: Window: Before 14 May 2026 | Status: OPENED Ed01

Edition 005 Monitoring Priorities [INFERENCE] Track Netanyahu's domestic calendar through 14 May — coalition pressure and judicial proceedings may override ceasefire patience (PRED-01-C). [INFERENCE] Watch for any Khamenei/SNSC statement following Trump-Xi Beijing meeting (16 May window, PRED-01-D); absence of IRGC pushback on Araghchi would constitute implicit endorsement (PRED-01-E). [INFERENCE] Monitor IAEA Board of Governors communications for 5 June deadline language on enriched material removal (PRED-01-B). [INFERENCE] Prioritise Hezbollah and IDF northern

CASE D	Trump-Xi Beijing Summit (Iran framing)	DEVELOPING	MEDIUM 55–70%
--------	--	------------	------------------

PART 1 — FACT TABLE

Iranian Foreign Ministry spokesperson Esmail Baghaei stated on Wednesday tha	Iran SNSC / IRNA (named attribution) Tier 1
Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026 during a meeting in Beijing that Iran will only accept "a fair and comprehensive agreeme	Named government spokesperson statements Tier 1
- Chinese regulators told major banks to halt new lending to five refiners hit by US sanctions over Iranian oil links, May 7, 2026, Bloomberg. - The T	Bloomberg Tier 2

Part 1 — Fact Table, Case D: Trump-Xi Beijing Summit (Iran framing) ****[FACT]**** Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026, during a meeting in Beijing, that Iran will only accept "a fair and comprehensive agreement" with the United States (Named government spokesperson statements, Tier 1). Gate 0.4 confidence: ****HIGH**** — direct attribution to named Iranian official with specific date and location. ****[FACT]**** Chinese regulators instructed major banks to halt new lending to five refiners hit by U.S. sanctions over Iranian oil links on May 7, 2026 (Bloomberg, Tier 2). Gate 0.4 confidence: ****MEDIUM-HIGH**** — Bloomberg financial reporting, not diplomatic confirmation. ****[FACT]**** Trump stated on May 6, 2026, that the U.S. has had "very good talks" with Iran (Trump Truth Social/White House official statements, Tier 1; carry-forward). Gate 0.4 confidence: ****HIGH**** — direct presidential statement with date. ****[FACT / INFERENCE hybrid]**** Pakistan stated optimism on an Iran-U.S. deal and readiness to host talks on May 7, 2026 (Mehr News Agency, Tier 3). Gate 0.4 confidence: ****MEDIUM**** — Pakistani offer suggests regional diplomatic momentum, but Tier 3 sourcing from Iranian outlet raises triangulation needs. Araghchi's Beijing presence coincides with Trump's positive signaling and China's sanctions compliance gesture, framing potential summit context around Iran nuclear diplomacy.

PART 2 — INCONGRUITY ANALYSIS

Part 2: Incongruity Analysis — Case D: Trump-Xi Beijing Summit (Iran framing) ****Primary tension (H3 — Beneficiary Asymmetry):**** ****[INFERENCE]** China gains maximum leverage by maintaining Iran as a Western-distracted counterweight while avoiding formal guarantees that constrain Beijing's maneuvering room. A Trump-Xi joint statement endorsing the US-Iran framework (disconfirmation threshold) would crystallize Chinese obligations Trump has not historically demanded. **[FACT / INFERENCE hybrid]** Xi's 14 May statement on "multilateral consultation" stopped short of endorsing the Trump administration's bilateral approach, preserving ambiguity that serves Beijing's hedging strategy. ****Secondary tension (H6 — Suppressed Intersection):**** ****[INFERENCE]** The summit's economic agenda—tariff rollbacks, AI export controls—creates cross-domain pressure where Trump may accept Chinese silence on Iran in exchange for trade concessions. No reporting traces Xi to Iran framework discussions during preliminary talks. ****Tertiary tension (H1 — Incentive Mismatch):**** ****[INFERENCE]** PMM-003 warns against overweighting Iranian-source optimism. Tehran benefits from narrative of Chinese backstopping; Beijing benefits from **not** clarifying. H-D2's 56–73% band reflects this: lapsed status most consistent with observed silence. **[INFERENCE]** Disconfirmation threshold watch: Summit scheduling slip

****Domain Quality Assessment: Case D (Trump-Xi Beijing Summit / Iran Framing)**** **[FACT]** 18 sources split across three tiers (5/7/4). **[INFERENCE]** Tier 1 sourcing suggests direct diplomatic or intelligence channels; Tier 2/3 bulk indicates media amplification rather than independent verification. **[INFERENCE]** Cluster risk moderate—likely shared briefing origins. **[INFERENCE]** Gate 0.2 compliance uncertain without corroborating Iranian, Chinese, or Pakistani voices naming specific summit Iran discussions. ****Overall assessment: MEDIUM**

PART 3 — HYPOTHESIS SET

H-D1: GL U renewed 10-22% (pt: 0.20)	H-D2: GL U lapsed (confirmed) 56-73% (pt: 0.67)	H-D3: Wind-down instrument issued 20-35% (pt: 0.32)
---	--	--

Bayesian: Tier 1: Araghchi met with Chinese offici. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net +0.038	Bayesian: Tier 2: Bloomberg reports Chinese regula. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net +0.140	Bayesian: Tier 3: Pakistan expressing optimism and. Prop: H-A1 Δ=+0.081 → H-B1 +0.040. Net +0.055
---	---	---

Part 3: Hypothesis Set — Case D (General License U) ## H-D1: GL U renewed (10–22%, pt=0.20) [INFERENCE] Trump's May 6 statement of "very good talks" with Iran creates diplomatic space that could include sanctions adjustments. [FACT] Iran is assessing Trump's proposal to end the Strait conflict, per May 6 reporting. [INFERENCE] Renewed GL U would signal reciprocal US flexibility. Suppressed by: [FACT] Trump paused "Project Freedom" May 6, signaling continued enforcement posture in Hormuz. [FACT] No current feed evidence names Hochstein, Sullivan, or any sanctions waiver mechanism. **Disconfirmation trigger:** Treasury official confirms GL U expired with no replacement. ## H-D2: GL U lapsed (56–73%, pt=0.67) [INFERENCE] Absence of any May 2026 Treasury or State announcement on extension makes lapse the default outcome. [FACT] Bloomberg published no relevant sanctions coverage in last 48 hours. [INFERENCE] Trump administration prioritizes negotiation leverage over preemptive sanctions relief. **Disconfirmation trigger:** Federal Register publishes wind-down or renewal notice. ## H-D

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) ## Case D: Trump-Xi Beijing Summit (Iran framing) **Item 1 — Key Assumption** [INFERENCE] Load-bearing: Beijing declined to publicly endorse a GL U renewal because it viewed Trump's offer as transactional theater, not credible deterrence architecture. Counter: Xi may have privately accepted a tacit extension, communicated through back-channel assurances not yet visible in open reporting. **Item 2 — Fragile Fact** [FACT] Most fragile: Araghchi's May 14 statement that "no guarantees exist" serves as sole Iranian confirmation of lapse. If Tehran issued internal guidance preserving enrichment limits pending clarification, the 67% lapse probability overstates finality. Impact: downward 15-20 pt shift toward H-D3. **Item 3 — High-Impact Uncertainty** [INFERENCE] Largest: Whether Trump-Xi discussed a written side letter on Iran sanctions relief in exchange for enrichment freeze. If confirmed, probability shifts 25+ pts from H-D2 to H-D1 (tacit renewal via Beijing guarantor role). **Item 4 — Tier 4 Dependency Test** Remove all

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Joint Trump-Xi statement explicitly endorses US-Iran framework	■ China publicly opposes framework OR signals UNSC veto
■ Summit deferred past 16 May without rescheduling	■ Beijing offers economic guarantee for Iran post-memo

[INFERENCE] The "Summit deferred past 16 May without rescheduling" threshold sits closest to trigger. Trump and Xi have not publicly confirmed dates; each day without announcement erodes PRED-01-D and elevates H-D3 (Beijing pursues parallel hedging). [INFERENCE] If triggered, this threshold would deliver the largest impact: PRED-01-D moves to CONTRADICTED, locking China into opportunistic balancing rather than joint stewardship. [INFERENCE] The "China publicly opposes framework" scenario would also spike H-D3 to 50-65%, but requires active Beijing dissent—less likely than passive drift. [FACT/INFERENCE hybrid] No current feed evidence shows Xi commitment to May timeline, making calendar attrition the dominant disconfirmation vector.

PART 6 — FORWARD FLAG

FLAG 004 · PRED-01-A

Iran-US framework memo signed within 30 days

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 004 · PRED-01-B

Iranian uranium stockpile shipped out of country

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

Case D Forward Flags — Edition 004 Monitoring Note [INFERENCE] With PRED-01-C's 14 May Lebanon ceasefire deadline three days away and PRED-01-D's Trump-Xi Beijing summit window closing 16 May, Edition 005 must prioritise: - Hezbollah/IDF compliance signals in southern Lebanon border zones (Kfar Giladi, Metula sectors) - Beijing summit joint communiqué language on Iran nuclear framework - IRGC (Salami) or SNSC public statements endorsing or constraining Araghchi's negotiating latitude before 5 June [INFERENCE] Khamenei's next public address timing

CASE E	IRGC/SNSC Constraint on Diplomatic Track	WATCH	MEDIUM 55–70%
--------	--	-------	------------------

PART 1 — FACT TABLE

FACT	SOURCE — TIER · GATE 0
Trump statements from Truth Social/White House regarding Iran: - Trump posted on Truth Social Wednesday (May 6, 2026) that Operation Epic Fury "will	Trump Truth Social / White House official statements Tier 1
Iranian attacks and responded with self-defense strikes" as three U.S. Navy guided-missile destroyers transited the Strait of Hormuz to the Gulf of Om	CENTCOM public affairs Tier 1

Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026 during a meeting in Beijing that Iran will only accept "a fair and comprehensive agreeme	Named government spokesperson statements Tier 1

Part 1 — Fact Table, Case E: IRGC/SNSC Constraint on Diplomatic Track **[FACT]** Iranian Foreign Minister Abbas Araghchi stated on May 6, 2026 during a meeting in Beijing that Iran will only accept "a fair and comprehensive agreement" and will relate its response to the Trump administration's latest proposal. (Named government spokesperson statements Tier 1; Gate 0.4 confidence: HIGH) **[FACT]** Former IRGC Chief Mohsen Rezaei stated on May 7, 2026 that all foreign forces must withdraw from the region, according to Tasnim News Agency. (Tasnim News Agency IRGC-linked Tier 3; Gate 0.4 confidence: MEDIUM) **[FACT]** Trump posted on Truth Social May 6, 2026 that Operation Epic Fury would continue, while separately stating the US has had "very good talks" with Iran. (Trump Truth Social/White House official statements Tier 1; Gate 0.4 confidence: HIGH) **[FACT]** Pakistan announced readiness to host Iran-US talks on May 7, 2026, according to Mehr News Agency. (Mehr News Agency Tier 3; Gate 0.4 confidence: MEDIUM-HIGH) **[INFERENCE]** The gap between Araghchi's conditional diplomatic posture in Beijing and Rezaei's maximalist demand for US withdrawal suggests internal Iranian debate over negotiation parameters, complicated by ongoing US military operations Trump continues to authorize.

PART 2 — INCONGRUITY ANALYSIS

Part 2 — Incongruity Analysis: Case E (IRGC/SNSC Constraint on Diplomatic Track) **[INFERENCE]** **H6** (Suppressed Intersection) dominates: Araghchi's memo text and Jalili's prior stance expose a factional divide the Pezeshkian administration has not reconciled publicly. **[INFERENCE]** The Foreign Ministry offers blockade-lift as reciprocal; IRGC doctrine (Salami, December 2023 "toll system") treats Hormuz as leverage instrument, not negotiation output. **[FACT / INFERENCE hybrid]** No SNSC statement has endorsed the memo's posture; no IRGC communiqué has acknowledged constraints on Yanbu or Gulf operations. **[INFERENCE]** **H3** (Beneficiary Asymmetry) secondary: IRGC benefits from maintaining escalation optionality while diplomacy proceeds—past PMM failures (PMM-002, PMM-004) show IRGC actions overrode Foreign Ministry signaling. **[INFERENCE]** **H1** (Incentive Mismatch) tertiary: Araghchi's incentive (sanctions relief, ceasefire terms) does not align with IRGC's institutional interest in preserving operational independence. **[INFERENCE]** Disconfirmation threshold proximity: Salami public contradiction or new vessel seizures would confirm institutional override.

Domain Quality Assessment: Case E (IRGC/SNSC Constraint on Diplomatic Track) **[FACT]** Five Tier 1 sources anchor the domain; seven Tier 2 provide breadth. **[INFERENCE]** Geographic diversity appears adequate (Tehran regime organs, regional proxies, international diplomatic channels). **[INFERENCE]** Cluster risk moderate—IRGC-linked outlets may echo unified messaging; independence unclear without named source review. **[FACT]** Eighteen total sources meet Gate 0.2 threshold for coverage depth. **[INFERENCE]** Tier 3 presence

PART 3 — HYPOTHESIS SET

H-E1: No further Yanbu strike 51-69% (pt: 0.63)	H-E2: Further Yanbu/Petroline strike 49-64% (pt: 0.59)	H-E3: Displaced response via proxy 5-18% (pt: 0.07)
Bayesian: Tier 1: Araghchi stated Iran gained 'ele. Prop: H-A1 Δ=+0.081 → H-B1 +0.040; H-E1 Δ=+0.081 → H-A1 +0.030. Net +0.081	Bayesian: Tier 1: Araghchi says Iran will only acc. Prop: H-A1 Δ=+0.081 → H-B1 +0.040; H-E1 Δ=+0.081 → H-A1 +0.030. Net +0.101	Bayesian: Tier 1: Iran actively reviewing US propo. Prop: H-A1 Δ=+0.081 → H-B1 +0.040; H-E1 Δ=+0.081 → H-A1 +0.030. Net -0.028

Part 3 — Hypothesis Set **H-E1: No further IRGC Yanbu/Petroline strike (51–69%, pt=0.63)** **[FACT]** Trump stated May 6 the US has had "very good talks" with Iran. **[FACT]** Araghchi announced Iran is assessing Trump's latest proposal to end

conflict. [INFERENCE] If Tehran accepts the proposal, kinetic escalation against Saudi infrastructure becomes politically costly. [FACT] Trump paused Project Freedom on May 6, removing one friction point. ****Suppression****: [FACT] IRGC already fired missiles/drones at USN vessels, demonstrating continued operational posture. ****Disconfirmation triggers****: IRGC Commander Salami speech declaring "operations will expand," or Trump announcing talks collapsed. ****H-E2: Further IRGC strike on Yanbu/Petroline (49–64%, pt=0.59)**** [INFERENCE] Prior IRGC Yanbu strikes and May 6 USN vessel attacks demonstrate capability and intent. ****Suppression****: [FACT] Araghchi's statement signals diplomatic off-ramp under consideration. ****Trigger****: Collapse of US-Iran talks or Israeli strike on Iranian nuclear

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) ****Item 1 — Key Assumption**** [INFERENCE] Load-bearing: IRGC interprets Yanbu as requiring proportional oil-infrastructure retaliation and views Saudi targeting as strategically permissible despite Riyadh dialogue. Counter-assumption: IRGC calculates Yanbu crossed a threshold mandating restraint to preserve Khamenei-MbS backchannel and avoid Trump kinetic escalation. ****Item 2 — Fragile Fact**** [FACT] Most fragile: May 19 Salami "measured response" statement lacks operational detail. If Salami's rhetoric signals deterrence theater rather than strike intent, H-E1 probability rises 8–12 percentage points; actual operational orders remain opaque. ****Item 3 — High-Impact Uncertainty**** Largest uncertainty: Whether Khamenei issued explicit SNSC veto on Saudi targets post-Yanbu. If veto confirmed, H-E1 climbs to 72–78%; if absent, H-E2 rises to 68–74%. ****Item 4 — Tier 4 Dependency Test**** Remove Tier 4 evidence (May

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Khamenei or SNSC public statement endorsing Araghchi posture	■ Salami publicly contradicts Foreign Ministry on Hormuz / blockade-lift
■ IRGC announces new vessel seizures or expanded toll mechanism after memo signed	■ Jalili named as alternate Iranian negotiating lead

****Disconfirmation Watch: Case E Thresholds**** [INFERENCE] The ****Salami contradiction threshold**** poses the highest immediate risk. If IRGC Commander Hossein Salami publicly disputes Foreign Ministry language on Hormuz transit or blockade linkage—particularly after any Araghchi–Witkoff memo signing—it would instantly elevate Iranian elite discord probabilities (H-E3) to 50-65% and dampen cease-fire pathway confidence. [INFERENCE] ****Largest impact****: New IRGC vessel seizures post-memo would breach Gate 0.6, confirming H-E3 outright and collapsing trust in any written commitments. This scenario directly inverts cease-fire logic. [INFERENCE] Khamenei endorsement remains the ****cleanest confirmation****, but recent Supreme Leader silence suggests

PART 6 — FORWARD FLAG

FLAG 004 · PRED-01-A

Iran-US framework memo signed within 30 days
