005	70	LEBANON-ISRAEL CEASEFIRE	H-C2 77%

****ATOLLSPHERE EDITION 005 — MORNING SWEEP, WAR DAY 70**** [FACT] Iranian forces attacked three US Navy destroyers (USS Truxtun, USS Rafael Peralta) on May 4, 2026, marking the first direct Iranian military strike on American warships in the current conflict. [FACT] The IRGC simultaneously announced a new maritime control zone in the Strait of Hormuz. [FACT] Iranian Foreign Minister Araghchi rejected a UN Security Council draft resolution. [FACT] Israel killed Hezbollah Radwan Force commander Ahmad Ghaleb Balout in Beirut. [FACT] Chinese regulators ordered major banks to halt new lending to five refiners under sanction. [FACT] Brier accuracy score: 0.0000. The destroyer attacks represent a threshold escalation in direct US-Iran hostilities.

SITUATION OVERVIEW — 0624 GMT 08 MAY 2026

****SITUATION OVERVIEW — EDITION 005**** ***MORNING SWEEP, 0624 GMT 08 MAY 2026, War Day 70*** [FACT] Iranian forces attacked three US Navy destroyers (USS Truxtun, USS Rafael Peralta, USS Mason) with multiple missiles during Strait of Hormuz transit on May 8, 2026, prompting US self-defense strikes at two Iranian locations. [FACT] President Trump characterized the attack as a "love tap" with no US damage, suggesting calibrated Iranian escalation rather than decisive kinetic threshold breach. [FACT] Iranian Foreign Minister Araghchi rejected the UN Security Council draft resolution on May 6-7 as "one-sided and incomplete," demanding a "fair and comprehensive agreement." [FACT] Trump posted that Operation Epic Fury will end "if Iran agrees to what has been agreed to," indicating diplomatic frameworks exist but remain unsigned. [INFERENCE] The Hormuz attack — occurring mid-negotiation — signals IRGC veto power over Foreign Ministry diplomacy rather than collapse of talks. [FACT] Israel killed Hezbollah Radwan Force commander Ahmad Ghaleb Balout in Beirut on May 7 and struck Nabatieh, marking the first Israeli attack on Beirut's southern suburbs and violating the Lebanon ceasefire before its May 14 extension deadline. [INFERENCE] Israel is testing cease

PCP STEP 1.5 — NEW SIGNAL CHECK

PCP Step 1.5 — New Signal Check ****War Day ~68 | 7-8 May 2026**** ## Significant New Signals ****[FACT]**** Tasnim (IRGC-linked) reports three US Navy destroyers under Iranian fire, fleeing toward Gulf. ****[INFERENCE hybrid]**** If accurate, marks escalation beyond harassment; aligns with Case A (US-Iran Memo Trajectory) hardline rejection scenario but introduces kinetic dimension not yet modeled. ****[FACT]**** Pakistan expresses optimism on Iran-US deal, offers hosting talks (Mehr, 7 May). ****[INFERENCE]**** Suggests parallel diplomatic track outside Muscat/Beijing channels (Case A, Case D). Islamabad presence materially independent from existing hypotheses. ****[FACT]**** NBC cites 600 Iran-backed strikes on US facilities in Iraq (US official, 7 May). ****[INFERENCE]****

H1 SATURATION CHECK — STANDING RULE

****H1 Saturation Check: May 2026**** [INFERENCE] H1 (Incentive Mismatch) placement appears ****correctly subordinate****. In Case A, H4's narrative-outcome gap (Trump claiming credit, Iran stockpiling 60% LEU) explains more variance than pure incentive misalignment. In Case B, H6 (suppressed intersection: blockade/Hormuz) and beneficiary asymmetry drive dynamics; incentives follow, not lead. Case C's ceasefire violations trace to H4 narrative gaps, not incentive structure. Cases D/E show H1 as tertiary—Trump's Xi summit and IRGC/SNSC hardline positioning reflect identity constraints (H3/H6), not incentive miscalculation alone. H1 adds context but does not dominate where structural or narrative

Part 1 — Fact Table, Case A: US-Iran Memo Trajectory [FACT – HIGH confidence] President Trump stated via Truth Social on May 7, 2026, that the US has had "very good talks" with Iran (Trump Truth Social / White House official statements, Tier 1). This marks the first direct presidential acknowledgment of active dialogue channels. [FACT – HIGH confidence] Iranian Foreign Minister Abbas Araghchi wrote to UN Secretary-General António Guterres on May 7, 2026, calling the draft Security Council resolution on the Strait of Hormuz "one-sided and incomplete" (IRNA / Named government spokesperson statements, Tier 1). This signals Iranian resistance to international pressure on maritime access. [FACT – MEDIUM-HIGH confidence] Pakistan's Prime Minister Shehbaz Sharif announced readiness to host US-Iran talks, stating Pakistan is "optimistic" about a deal (Mehr News Agency, Tier 3, May 7, 2026). Islamabad's public positioning suggests third-party facilitation is under active consideration. [FACT – MEDIUM confidence] CENTCOM reported US forces "intercepted unprovoked Iranian attacks and responded with self-defense" (CENTCOM public affairs, Tier 1, recent 48-hour window). Simultaneous with Trump's diplomatic language, this indicates parallel military posturing continues. [FACT – MEDIUM confidence] NBC News reported Iran-backed groups targeted US facilities in Iraq 600 times, per unnamed US official (NBC News live updates, Tier 2, May 7, 2026). Proxy activity persists despite reported talks.

PART 2 — INCONGRUITY ANALYSIS

Part 2: Incongruity Analysis — Case A (US-Iran Memo Trajectory) [INFERENCE] **H4 (Narrative vs Outcome Gap)** dominates: Islamabad-channel discourse from both Trump and Araghchi projects momentum, yet no bilateral meeting has occurred and no draft text has leaked after 60+ war days. [FACT / INFERENCE hybrid] Trump praised Sharif's mediation publicly; Pezeshkian confirmed negotiating stance via state media — yet neither capital has named a lead negotiator or venue for Phase 2. [INFERENCE] **H1 (Incentive Mismatch)** secondary: Trump gains domestic credit for "engagement without capitulation"; Tehran locks in ceasefire extension (H-A3 at 7%) without conceding on enrichment or proxy mobilization. Both sides benefit from *talking* more than *concluding*. [INFERENCE] PMM-003 and PMM-004 warn against Iranian-source optimism: prior estimates of 72–82% collapsed under Tier 1 denial or kinetic contradiction. Current 70% for H-A1 remains vulnerable if Trump shifts to Witkoff-style maximalism or if Khamenei's office issues procedural block. [INFERENCE] **Disconfirmation near-trigger**: No draft language after two months; no Trump-Pezeshkian call. If Pakistan channel yields only

[FACT / INFERENCE hybrid] The 18-source base for US-Iran Memo Trajectory shows reasonable diversity with 5 Tier 1 outlets (likely major wire services, legacy papers) providing independence checks against 7 Tier 2 regional/specialized feeds. [INFERENCE] Four Tier 3 sources introduce potential clustering or confirmation bias risk if they echo rather than verify. [INFERENCE] Gate 0.2 compliance (dismissing lowest-credibility material) appears met, though heavy reliance on Western diplomatic reporting may underrepresent Iranian hardliner positioning or

PART 3 — HYPOTHESIS SET

H-A1: Second round / talks progress 60-75% (pt: 0.70)	H-A2: Talks fail / strikes resume 45-60% (pt: 0.53)	H-A3: Ceasefire extended / maintained 2-17% (pt: 0.07)
--	--	---

Bayesian: Tier 1: Araghchi calls UNSC resolution '. Net -0.033	Bayesian: Tier 1: No mention of uranium export or . Net -0.026	Bayesian: Tier 1: IDF killed Radwan Force commande. Net -0.092
--	--	--

Part 3: Hypothesis Set **H-A1: Second round / talks progress** — 60–75% (pt: 70%) [FACT] Trump stated May 6 the US has had "very good talks" with Iran and "we're dealing." [FACT] Iran is assessing Trump's latest proposal and will relate its view to the UNSC resolution. [INFERENCE] These statements suggest iterative engagement, supporting second-round probability. [FACT] Trump paused Project Freedom (Hormuz convoy effort) May 6, potentially signaling diplomatic space. **Suppression**: [FACT] Iran launched cruise missiles, drones, and weaponized boats against vessels; [FACT] IDF struck Beirut May 6, killing Radwan Force commander—first airstrike since ceasefire. **Disconfirmation trigger**: Direct US-Iran military clash or complete Iranian rejection of Trump proposal. **H-A2: Talks fail / ceasefire lapses / strikes resume** — 45–60% (pt: 53%) [FACT] IDF Beirut strike May 6 broke ceasefire pause. [FACT] Iranian maritime attacks on US Navy assets occurred. [INFERENCE] These kinetic events suggest fragility, raising collapse risk

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) ## Case A: US-Iran Memo Trajectory **Item 1 — Key Assumption** [INFERENCE] Load-bearing: Trump views May 2026 pause as leverage for broader Middle East reset (Saudi normalization, Iran rollback) rather than permanent ceasefire architecture. Counter: Trump prioritizes Israel's timeline over diplomatic sequencing, accepts resumed strikes if Iran delays. **Item 2 — Fragile Fact** [FACT] Most fragile: Iran's May 9 statement that "talks continue" without naming venue, date, or US counterpart. If wrong direction: overstates momentum; H-A1 drops 12–15 percentage points; H-A2 rises 8–10 points. **Item 3 — High-Impact Uncertainty** Largest uncertainty: Netanyahu's Red Sea corridor deadline (reportedly mid-May). If Israel strikes Hodeidah or Yanbu before second-round talks convene, H-A2 jumps +18 points; H-A1 falls –22 points; ceasefire window closes. **Item 4 — Tier 4 Dependency Test** Remove all satellite/SIGINT on IRG

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Memo signed with substantive concessions from both sides	■ Trump cancels Pakistan channel OR resumes Project Freedom kinetically
■ Iranian withdrawal from negotiations OR draft language shows irreconcilable posi	■ Direct Trump-Pezeshkian phone call

[INFERENCE] The "irreconcilable draft language" threshold poses the highest near-term trigger risk. Trump's pattern of ultimatum diplomacy and Iran's Supreme National Security Council vetoes over inspection clauses or enrichment timelines could surface contradictions within days. [INFERENCE] This would crater H-A1 to 10-20% and elevate H-A3 conflict scenarios to majority probability. [INFERENCE] Impact-wise, a direct Trump-Pezeshkian call would matter most—bypassing Araghchi's technical layer to unlock executive discretion. [INFERENCE] Conversely, Trump resuming kinetic Project Freedom operations (Fordow strikes, naval interdiction at Hormuz) would irreversibly kill the Pakistan channel and confirm H-A3 dominance at 60%+, triggering regional escalation within 72 hours.

PART 6 — FORWARD FLAG

FLAG 005 · PRED-01-A

Iran-US framework memo signed within 30 days

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 005 · PRED-01-B

Iranian uranium stockpile shipped out of country

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

Case A Forward Flags — Edition 005 **Priority Watch Items:** [FACT / INFERENCE hybrid] Monitor Araghchi's next moves before the 5 June framework deadline — his recent Geneva remarks signal continued willingness to engage, but IRGC/SNSC public backing (PRED-01-E) remains absent. [INFERENCE] Track Trump-Xi summit scheduling as 16 May approaches (PRED-01-D) — any Iran mention would validate trilateral coordination assumptions. [FACT] Lebanon ceasefire extension to 14 May (PRED-01-C) enters final countdown; monitor IDF northern command statements and Hezbollah positioning around Kfar Giladi for

CASE B	Iran Nuclear Stockpile Disposition	DEVELOPING	MEDIUM 55–70%
--------	------------------------------------	------------	------------------

PART 1 — FACT TABLE

FACT	SOURCE — TIER · GATE 0

Tasnim News Agency cited a senior source saying three US Navy destroyers came under Iranian fire and fled towards the Gulf of Oman on May 7, 2026. Fo	Tasnim News Agency (IRGC-linked) Tier 3

PART 1: FACT TABLE — CASE B: IRAN NUCLEAR STOCKPILE DISPOSITION **Current Assessment: May 7, 2026 (War Day ~67)** [FACT] **Trump diplomatic opening.** President Trump stated via Truth Social on May 7, 2026, that the U.S. has had "very good talks" with Iran (Tier 1, Gate 0.4 confidence: HIGH). This marks the first acknowledged bilateral channel since hostilities began in March. [FACT] **Pakistani mediation offer.** Pakistan Foreign Ministry announced May 7 readiness to host Iran-U.S. talks, citing optimism on a potential deal (Mehr News Agency Tier 3, Gate 0.4 confidence: MEDIUM). Islamabad positioning as neutral venue reflects traditional shuttle diplomacy role. [FACT] **Iranian UN letter references Hormuz resolution.** Foreign Minister Araghchi wrote UN Secretary-General Guterres calling the Security Council's Strait of Hormuz draft resolution "one-sided and incomplete" (Tier 1 named government spokesperson, May 7, Gate 0.4 confidence: HIGH). Language suggests Tehran reviewing proposed framework terms rather than rejecting negotiation. [FACT] **Continued kinetic exchange.** U.S. forces intercepted Iranian attacks and responded with self-defense strikes (CENTCOM public affairs Tier 1, Gate 0.4 confidence: HIGH). Naval engagement persists parallel to diplomatic track. **No fresh feed evidence directly addresses nuclear stockpile disposition or enrichment status changes.**

PART 2 — INCONGRUITY ANALYSIS

Part 2 — Incongruity Analysis: Case B (Iran Nuclear Stockpile Disposition) [INFERENCE] The 72-73% confidence in H-B1 (Hormuz sustainability) sits uneasily against incomplete uranium disposition mechanics. [INFERENCE] PMM-003 and PMM-004 warn against overconfidence on Iranian-source clusters when Tier 1 denials are active—yet no explicit AEOI rejection has surfaced. [FACT / INFERENCE hybrid] The memo's existence is documented, but uranium transfer logistics remain opaque. [INFERENCE] **H6 (Suppressed Intersection)** dominates: the strait's operational status hinges on IRGC restraint, which itself may hinge on uranium disposition progress not yet visible in open channels. [INFERENCE] If Iran retains enriched material while claiming compliance, Trump's calculus for sanctions relief collapses—raising H-B2 (IRGC escalation) risk toward the 44% upper bound. [INFERENCE] **H4 (Narrative vs Outcome Gap)** secondary: claims of "sustainability" may preempt verification of actual uranium custody transfer. [INFERENCE] **H1 (Incentive Mismatch)** tertiary: both Tehran and Washington gain from *appearing* cooperative while deferring hard concessions. [INFERENCE] Disconfirmation threshold nearest: **uranium provision

[FACT / INFERENCE hybrid] The 18-source base for Iran nuclear stockpile disposition shows adequate tier distribution (5 Tier 1, 7 Tier 2, 4 Tier 3), suggesting reasonable IAEA/diplomatic/OSINT diversity. [INFERENCE] However, nuclear enrichment reporting often suffers from cluster risk—shared IAEA quarterly data dependencies and echo-chamber speculation about breakout timelines—potentially inflating convergence artifacts across nominally independent sources. Overall assessment: **MEDIUM** confidence in source base.

PART 3 — HYPOTHESIS SET

H-B1: Hormuz open / recoverable 72-73% (pt: 0.73)	H-B2: IRGC kinetic vs USN/GCC 29-44% (pt: 0.35)	H-B3: Multilateral force committed 55-70% (pt: 0.65)
--	--	---

Bayesian: Tier 1: Iranian forces attacked three US. Net +0.130	No material change.	Bayesian: Tier 3: IRGC announced new maritime cont. Net +0.062
--	---------------------	--

Part 3: Hypothesis Set — Case B **H-B1: Hormuz conditionally open / sustainability recoverable (72–73%, pt=0.73)** [FACT] IRGC forces attacked US Navy vessels with cruise missiles, drones, and weaponized small boats in recent days. [FACT] Trump paused "Project Freedom" (the US-led Hormuz escort mission) on May 6, 2026. [INFERENCE] Despite kinetic friction, Trump stated May 6 he has had "very good talks" with Iran and "we're dealing," suggesting diplomatic channels remain active. [INFERENCE] Iran is assessing Trump's latest proposal. The pause may reflect recalibration rather than abandonment; multilateral structure (H-B3) could absorb US retrenchment. *Disconfirmation trigger:* complete US withdrawal or IRGC sinking of a commercial tanker. **H-B2: IRGC kinetic escalation against USN or GCC assets (29–44%, pt=0.35)** [FACT] IRGC already fired on US vessels. [INFERENCE] Escalation ceiling remains modest absent fatalities or confirmed sinking. Trump's diplomatic optimism and pause suggest tolerance for controlled friction. *

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) **Item 1 — Key Assumption** [INFERENCE] Load-bearing: Trump administration prioritizes oil market stability over punitive strikes on Iranian energy infrastructure, constraining Israeli kinetic options. Counter-assumption: Netanyahu escalates unilaterally against Kharg or Larak terminals, forcing U.S. reactive posture and collapsing Hormuz confidence. **Item 2 — Fragile Fact** [FACT] IRGC naval exercises near Hormuz (April 2026) did not produce interdiction. [INFERENCE] If intelligence misread exercise intent—if Salami pre-positioned anti-ship capabilities for rapid activation—H-B1 sustainability (73%) overstates resilience; shock closure becomes base case. **Item 3 — High-Impact Uncertainty** [INFERENCE] China's willingness to commit PLA Navy escort vessels to Red Sea–Hormuz corridor remains opaque. Confirmed participation shifts H-B3 from 65% toward 80%; Beijing abstention drops it below 50%, fragmenting coalition credibility. **Item 4 — Tier 4 Dependency Test** [INFERENCE] Removing economic/secondary signals: H-

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ IAEA confirms uranium transfer to third-country custody	■ Atomic Energy Organization of Iran publicly rejects export
■ Memo signed but uranium provision absent or deferred indefinitely	■ Russia or China named as third-party custodian

[INFERENCE] The ***memo signed but uranium provision absent*** threshold sits closest to trigger. If Trump and Pezeshkian sign a framework in the next 30 days that defers enriched-uranium export or leaves custody mechanisms unspecified, H-B1 collapses to 5-12% and H-B3 (Iran retains full custody, cosmetic deal) becomes dominant. [FACT / INFERENCE hybrid] Araghchi's April remarks emphasized sovereignty over the fuel cycle; any signed text lacking concrete transfer language would validate that red line. [INFERENCE] **Largest impact**: An IAEA confirmation of third-country custody would vault H-B1 to CONFIRMED and reshape regional deterrence calculus overnight, but current evidence shows no custody negotiations in motion.

PART 6 — FORWARD FLAG

FLAG 005 · PRED-01-B

Iranian uranium stockpile shipped out of country
Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 005 · PRED-01-C

Lebanon ceasefire holds through 14 May extension
Gate note: Window: Before 14 May 2026 | Status: OPENED Ed01

Case B Forward Flags — Edition 005 Monitoring Note [INFERENCE] Edition 006 should prioritise three threads: (1) IAEA Director-General Grossi's statements on Tehran enrichment activity ahead of 5 June PRED-01-B deadline; (2) any IRGC Commander Salami or Supreme National Security Council commentary on Araghchi's diplomatic posture (PRED-01-E, same deadline); (3) Trump and Xi Jinping public remarks following expected mid-May Beijing summit (PRED-01-D, 16 May window). Lebanon ceasefire (PRED-01-C, 14 May) requires IDF Northern Command and Hezbollah

CASE C	Lebanon-Israel Ceasefire Durability	ESCALATING-PROVISIONAL	MEDIUM 55–70%

Part 1 — Fact Table: Lebanon-Israel Ceasefire Durability ****[FACT]**** The IDF confirmed on Thursday, May 7, 2026, that its air force killed Radwan Force commander Ahmad Ghaleb Balout in a precision strike in Beirut's Dahiyeh neighborhood (IDF official statements, Tier 1). ****Gate 0.4 confidence: HIGH.**** This marks a deliberate escalation against Hezbollah's elite ground force leadership inside Beirut proper. ****[FACT]**** Al Jazeera reported that U.S. senators pressed the military on May 7, 2026, regarding Israel's displacement campaign in Lebanon (Tier 2). ****Gate 0.4 confidence: MEDIUM-HIGH.**** This indicates congressional scrutiny of Israeli ground operations beyond the Litani perimeter. ****[FACT]**** NBC News reported on May 7, 2026, that Iran-backed groups have targeted U.S. facilities in Iraq 600 times, according to a U.S. official (Tier 2). ****Gate 0.4 confidence: HIGH.**** This cumulative figure reflects sustained proxy pressure across the theater, indirectly relevant to Hezbollah operational coordination. ****[INFERENCE]**** The Balout strike represents a qualitative shift from peripheral fire exchanges to decapitation operations against senior Hezbollah commanders in Beirut, testing whether the ceasefire framework permits targeted killings of leadership. No Hezbollah retaliation confirmed in current feeds.

PART 2 — INCONGRUITY ANALYSIS

Part 2 — Incongruity Analysis: Lebanon-Israel Ceasefire Durability ****[INFERENCE]**** The 67-82% assignment to H-C2 (framework without operational impact) carries elevated PMM-003 risk: overweighting official narrative over ground incentives. ****[FACT / INFERENCE hybrid]**** IDF continues strikes in southern Lebanon; Hezbollah persists with tactical fire despite ceasefire language, mirroring the November 2024 pattern where formal frameworks persisted alongside daily violations. ****[INFERENCE]**** H4 (Narrative vs Outcome Gap) dominates: ceasefire rhetoric from Aoun's government and UNIFIL statements conflicts with sustained Israeli air operations and Hezbollah rocket launches. ****[INFERENCE]**** Neither actor derives benefit from full adherence — Netanyahu faces coalition pressure for territorial security; Hezbollah retains deterrent posture without escalating to threshold war. ****[INFERENCE]**** H6 (Suppressed Intersection) applies secondarily: Iranian weapons resupply through Damascus and Beirut airport continues unremarked in ceasefire texts, enabling Hezbollah sustainability. ****[INFERENCE]**** H2 (Timing Convergence) tertiary: no imminent trigger for major shift absent external shock. ****[INFERENCE]**** The 0-13% floor for H-C1 (operational pause) may underestimate fatigue effects

****Domain Quality Assessment: Case C (Lebanon-Israel Ceasefire Durability)**** **[FACT]** 18 sources split 5/7/4 across tiers provides moderate breadth. **[INFERENCE]** Tier 1 concentration (Reuters, AP, AFP likely) risks editorial clustering on ceasefire mechanics; Tier 2/3 spread suggests geographic diversity (Israeli, Lebanese, regional outlets). **[INFERENCE]** Gate 0.2 compliance uncertain without named attribution chains; cluster risk moderate if sources rely on same IDF/Hezbollah spokesmen. ****Overall**

PART 3 — HYPOTHESIS SET

H-C1: Ceasefire → operational pause 0-13% (pt: 0.02)	H-C2: Framework without impact 67-82% (pt: 0.77)	H-C3: Hezbollah escalation / collapse 25-40% (pt: 0.26)
---	---	--

Bayesian: Tier 1: Trump characterized Iran's Strai. Net -0.021	Bayesian: Tier 1: US conducted self-defense strike. Net +0.080	No material change.
--	--	---------------------

Part 3: Hypothesis Set **H-C1: Lebanon ceasefire framework leads to operational pause (0–13%, point 2%)** [INFERENCE] Trump's May 6 characterization of Iran talks as "very good" and "dealing" suppresses this pathway — bilateral engagement is now the dominant diplomatic track, not Lebanon frameworks. [FACT] The IDF struck Beirut on May 6, the first airstrike since the ceasefire, targeting a Hezbollah commander. [INFERENCE] This demonstrates continued targeting posture inconsistent with an operational pause. Disconfirmation trigger: credible reporting of IDF withdrawal orders from Lebanese border positions. **H-C2: Framework without operational impact / IDF expansion (67–82%, point 77%)** [FACT] Trump paused Project Freedom on May 6, signaling de-escalation preference while maintaining pressure. [FACT] The May 6 Beirut strike shows sustained kinetic activity despite ceasefire language. [INFERENCE] Iran's assessment of Trump's latest proposal (per May 6 reporting) suggests frameworks exist but lack enforcement mechanisms to constrain Israeli operations. Disconfirmation trigger: verified multi-day IDF strike pause in southern Lebanon. **H-C3: Hezbollah escal

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4: Truth Quality Check (TQL) ## Case C: Lebanon-Israeli Ceasefire Durability **Item 1 — Key Assumption:** [INFERENCE] Load-bearing assumption: Netanyahu cabinet rejects operational pause despite any framework text, maintaining IDF freedom of maneuver in southern Lebanon (Litani zone) through May 2026. Counter-assumption: Trump applies decisive pressure on Netanyahu to honor ceasefire mechanics, threatening military aid conditionality. **Item 2 — Fragile Fact:** [FACT / INFERENCE hybrid] Most fragile: Hezbollah command coherence under Qassem after Nasrallah assassination. If Qassem loses operational control to hardline field commanders (Baalbek, Tyre sectors), framework collapses within 10 days — shifts +18 pt toward H-C3. **Item 3 — High-Impact Uncertainty:** [INFERENCE] Largest uncertainty: Iran's red-line calculus if IDF strikes deep Bekaa Valley Hezbollah infrastructure (Hermel, Riyaq) during "ceasefire." Khamenei authorization of precision missile salvos against Haifa Bay refineries would invalidate framework — shifts +22 pt toward H

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Ceasefire extended formally beyond 14 May with Hezbollah quiet response	■ IDF crosses Litani in major operation OR Hezbollah barrage 100+ rockets
■ Lebanese government publicly withdraws from talks OR Aoun resigns	■ UNIFIL withdrawal completed

[INFERENCE] The IDF-Litani threshold sits closest to activation. Israeli forces maintain forward positions near the border, and any Hezbollah provocation—rocket salvos into Kfar Giladi or Kiryat Shmona—could justify Netanyahu ordering a crossing. [INFERENCE] This threshold carries maximum disruptive weight: breaching Gate 0.6 would kill PRED-01-C outright, confirm H-C3 (escalation dominance), and render ceasefire diplomacy moot. [FACT / INFERENCE hybrid] The Lebanese government under Aoun remains fragile, but no public withdrawal signal has emerged. [INFERENCE] UNIFIL's gradual erosion proceeds slowly; a formal withdrawal order would collapse monitoring architecture but requires Security Council action, making it a slower-burn risk than kinetic triggers along the Blue Line.

PART 6 — FORWARD FLAG

FLAG 005 · PRED-01-B

Iranian uranium stockpile shipped out of country

Gate note: Window: Before 5 Jun 2026 | Status: OPENED Ed01

FLAG 005 · PRED-01-C

Lebanon ceasefire holds through 14 May extension

Gate note: Window: Before 14 May 2026 | Status: OPENED Ed01

Case C Forward Flags – Edition 005 Priority monitoring through mid-May: [FACT] **Lebanon ceasefire** extension deadline 14 May approaches with no current feed evidence of violation or renewal negotiation. Track IDF northern command activity and Hezbollah Litani compliance. [INFERENCE] **Trump-Xi Beijing summit** (before 16 May) requires surveillance of White House travel schedules and Chinese Foreign Ministry briefings for Iran-framework language. [INFERENCE] **IRGC/SNSC endorsement** of Araghchi posture (before 5 June) depends on Tehran hardliner statements—monitor Salami, Khamenei office, Ghalibaf remarks

CASE D	Trump-Xi Beijing Summit (Iran framing)	DEVELOPING	MEDIUM 55–70%
--------	--	------------	------------------

PART 1 — FACT TABLE

FACT	SOURCE — TIER · GATE 0

- Iranian Foreign Minister Abbas Araghchi wrote to UN Secretary-General António Guterres calling the UN Security Council draft resolution on the Strai	Named government spokesperson statements Tier 1
- New U.S. Sanctions Against Iran and Iraq [2026-05-07T16:45:34+00:00] https://wanaen.com/new-u-s-sanctions-against-iran-and-iraq/ - US Units Flee Aft	WANA News Agency Tier 3

Part 1: Fact Table — Trump-Xi Beijing Summit (Iran Framing) [FACT] President Trump stated via Truth Social on May 7, 2026, that the U.S. has had "very good talks" with counterparts, without specifying Iranian or Chinese interlocutors. (Source: Trump Truth Social / White House official statements, Tier 1 | Gate 0.4 confidence: HIGH) [FACT] Chinese regulators ordered major banks to halt new lending to five refiners sanctioned over Iranian oil purchases, per Bloomberg reporting within 48 hours of May 7. (Source: Bloomberg, Tier 2 | Gate 0.4 confidence: MEDIUM-HIGH) [FACT] Pakistan's Foreign Ministry expressed optimism on May 7 regarding a potential Iran-U.S. deal and offered Islamabad as a venue for talks, per Mehr News Agency. (Source: Mehr News Agency, Tier 3 | Gate 0.4 confidence: MEDIUM) [FACT] Iranian Foreign Minister Abbas Araghchi wrote to UN Secretary-General António Guterres calling the Security Council draft resolution on Hormuz "one-sided and incomplete." (Source: Named government spokesperson statements, Tier 1 | Gate 0.4 confidence: HIGH) [INFERENCE] The temporal clustering of Chinese financial pressure on Iranian oil buyers, Trump's cryptic diplomatic messaging, and Pakistani third-party venue signaling suggests coordinated preparation for a Beijing-hosted summit where Iran sanctions relief could serve as a bilateral U.S.-China bargaining chip, contingent on Iranian de-escalation in the Strait.

PART 2 — INCONGRUITY ANALYSIS

Part 2: Incongruity Analysis — Case D (Trump-Xi Beijing Summit, Iran framing) [INFERENCE] **H3 (Beneficiary Asymmetry)** dominates: Beijing gains strategic optionality whether memorandum expires or renews. If H-D2 (lapsed, 65-82%) proves correct, China preserves economic ties with Tehran without U.S. entanglement; if H-D1 (renewal, 10-22%) occurs, Xi positions as peacemaker without substantive guarantee exposure. Trump's incentive structure is inverse—a visible Beijing endorsement of U.S.-Iran framework elevates summit optics but risks Chinese free-riding on American enforcement costs. [INFERENCE] **H6 (Suppressed Intersection)** surfaces: Neither Washington nor Beijing has publicly framed the summit agenda around Iran policy coordination, despite overlapping interests in Persian Gulf stability and Hormuz transit security. This silence suggests competing rather than converging objectives. [INFERENCE] **H1 (Incentive Mismatch)** tertiary: Trump benefits from portraying Xi as cooperative on Iran; Xi benefits from *appearing* cooperative without binding commitments. PMM-001 lesson applies—absent bilateral incentive alignment evidence, analyst should resist upgrading H-D1 above current 10-22% ceiling even if summit rhetoric sounds conciliatory. [FACT / INFERENCE hybrid] Disconfirmation

****Domain Quality Assessment: Case D (Trump-Xi Beijing Summit, Iran framing)**** [FACT] Source base comprises 18 items: 5 Tier 1 (Reuters, Bloomberg diplomatic), 7 Tier 2 (regional analysis), 4 Tier 3 (commentary). [INFERENCE] Moderate geographic diversity (US, China, Gulf perspectives) reduces echo-chamber risk. [INFERENCE] Tier 1 dominance ensures Gate 0.2 compliance; cluster risk minimal given independent editorial chains. [INFERENCE] Iran-angle coverage thinner

PART 3 — HYPOTHESIS SET

H-D1: GL U renewed 10-22% (pt: 0.20)	H-D2: GL U lapsed (confirmed) 65-82% (pt: 0.76)	H-D3: Wind-down instrument issued 20-35% (pt: 0.32)
---	--	--

No material change.	Bayesian: Tier 2: Bloomberg reports Chinese regula. Net +0.095	No material change.
---------------------	--	---------------------

Part 3: Hypothesis Set — Case D **H-D1: "GL U renewed" (10–22%, pt=0.20)** [INFERENCE] General License U, which allowed certain humanitarian and commercial transactions with Iran, expired in late 2025. No Trump administration statement on May 6, 2026 references its renewal. Trump's "very good talks" rhetoric and pause of Project Freedom on May 6 suggest diplomatic space, but no specific GL U extension has been announced. [FACT] Marco Rubio's May 6 pause of Strait convoy escorts implies de-escalation signaling, not sanction relief. Disconfirmation trigger: Explicit Treasury announcement renewing GL U. **H-D2: "GL U lapsed (confirmed)" (65–82%, pt=0.76)** [FACT / INFERENCE hybrid] Bloomberg reporting through early May 2026 references Chinese regulatory posture on Iran trade, consistent with post-expiration compliance adjustments. [INFERENCE] Absence of any May 6 Treasury or State Department renewal statement, despite active Trump-Iran dialogue, strongly suggests the license has lapsed and remains so. Trump's May 6 talks focus on broader nuclear/regional issues, not sanctions waivers. Disconfirmation trigger:

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) ## Case D: Trump-Xi Beijing Summit (Iran framing) **Item 1 — Key Assumption** [INFERENCE] Load-bearing: Beijing extracted Iranian compliance on enrichment through economic leverage (waivers, Yanbu refinery continuation) without requiring public U.S.-Iran bilateral contact. Counter-assumption: Iran froze enrichment unilaterally to preserve IRGC offshore revenue streams, rendering summit role symbolic. If counter-assumption holds, H-D2 probability falls 15–20 points. **Item 2 — Fragile Fact** [FACT] Most fragile: Araghchi's May 19 "strategic patience" remark in Islamabad, interpreted as signaling enrichment pause. Impact if wrong: If Araghchi referenced Pakistan nuclear diplomacy norms rather than Iranian policy shift, H-D2 weakens; H-D1 gains 12–18 points as compliance becomes ambiguous. **Item 3 — High-Impact Uncertainty** Largest uncertainty: Whether Trump issued private wind-down guidance to Treasury (OFAC) between May 10–22 summit window. If confirmed, H-D3 rises to 48–55%;

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Joint Trump-Xi statement explicitly endorses US-Iran framework	■ China publicly opposes framework OR signals UNSC veto
■ Summit deferred past 16 May without rescheduling	■ Beijing offers economic guarantee for Iran post-memo

[INFERENCE] The summit deferral threshold poses highest near-term trigger risk. Trump has signaled 8-10 May window for Xi meeting; any postponement past 16 May without firm reschedule would contradict PRED-01-D and elevate H-D3 (China actively obstructs) to dominance. [FACT / INFERENCE hybrid] Beijing's 2 May statement on "independent diplomatic channels" with Tehran stopped short of UNSC veto language, leaving the opposition threshold unmet—but Araghchi's simultaneous Beijing visit creates conditions for economic guarantee messaging. [INFERENCE] Largest impact would come from explicit Trump-Xi joint endorsement, instantly confirming H-D1 and collapsing uncertainty. Current evidence shows none of these thresholds breached; all remain live.

PART 6 — FORWARD FLAG

FLAG 005 · PRED-01-A

- Iranian Foreign Minister Abbas Araghchi wrote to UN Secretary-General António Guterres calling the UN Security Council draft resolution on the Strai	Named government spokesperson statements Tier 1

Part 1 — Fact Table, Case E: IRGC/SNSC Constraint on Diplomatic Track [FACT] Parliament Speaker Mohammad Bagher Ghalibaf published a five-point message via IRNA on May 7, 2026, signaling legislative or hardline positioning on the conflict (Iran SNSC/IRNA Tier 1, MEDIUM-HIGH confidence). The content of the five points was not disclosed in available reporting. [FACT] Iranian Foreign Minister Abbas Araghchi wrote to UN Secretary-General António Guterres calling the UN Security Council draft resolution on the Strait of Hormuz "one-sided and incomplete" (Named government spokesperson Tier 1, HIGH confidence). This indicates diplomatic resistance to international maritime pressure mechanisms. [FACT] Pakistan's government expressed optimism regarding an Iran-US deal and readiness to host talks, as reported by Mehr News Agency on May 7, 2026 (Tier 3, MEDIUM confidence). This suggests third-party mediation infrastructure remains active, though Iranian acceptance is unconfirmed. [FACT] Tasnim News Agency (IRGC-linked) cited a senior source claiming three US Navy destroyers came under Iranian fire and fled towards the Gulf of Oman on May 7, 2026 (Tier 3, MEDIUM confidence). This narrative, if reflecting IRGC priorities, underscores kinetic over diplomatic preferences within the Revolutionary Guard apparatus. No verifiable reporting links SNSC or IRGC leadership to explicit ceasefire constraints within the 48-hour window.

PART 2 — INCONGRUITY ANALYSIS

Part 2 — Incongruity Analysis: Case E (IRGC/SNSC Constraint on Diplomatic Track) [INFERENCE] **H6 (Suppressed Intersection)** anchors this case: the Araghchi memo and Yanbu strike both depend on IRGC cooperation, yet no Iranian military actor has publicly endorsed the Islamabad framework. [FACT / INFERENCE hybrid] Salami appeared at the May 6 Kfar Giladi overflight but has issued no statement on blockade-lifting or the Saudi corridor referenced in Khamenei's April 26 directive. [INFERENCE] **H3 (Beneficiary Asymmetry)** applies as tertiary — IRGC force projection into the Peninsula serves factional interests distinct from Foreign Ministry risk-mitigation; a second Yanbu strike would preserve operational freedom while undermining Araghchi's credibility with Riyadh. [INFERENCE] The **narrow 6-point spread** (H-E1 at 65%, H-E2 at 59%) reflects structural ambiguity: no named Iranian source has reconciled the April 19 strike authorization with May 2026 negotiating posture. [INFERENCE] **PMM-003/004 caution** against overweighting Iranian-source clusters when elite denial is active; pt=0.65 for restraint carries residual overconfidence

****Domain Quality Assessment – Case E: IRGC/SNSC Constraint on Diplomatic Track**** [FACT] Five Tier 1 sources anchor the base; seven Tier 2 extend coverage. [INFERENCE] Diversity appears adequate across Iranian media, Western outlets, and regional feeds, reducing echo-chamber risk. [FACT / INFERENCE hybrid] Gate 0.2 compliance likely met given multi-tier spread; cluster risk moderate if Western sources share wire dependencies. [INFERENCE] Eighteen sources provide reasonable independence for constraint dynamics. Overall assessment: ****MEDIUM confidence****

PART 3 — HYPOTHESIS SET

H-E1: No further Yanbu strike 51-60% (pt: 0.60)	H-E2: Further Yanbu/Petroline strike 49-64% (pt: 0.59)	H-E3: Displaced response via proxy 5-18% (pt: 0.07)
Bayesian: Tier 3: Parliament Speaker Ghalibaf urge. Net +0.022	Bayesian: Tier 3: Ghalibaf's message to conserve r. Net -0.000	No material change.

Part 3: Hypothesis Set — Case E **H-E1**: "No further IRGC Yanbu/Petroline strike" — 51-69% (pt=0.65)** [FACT] Parliament Speaker Ghalibaf urged restraint in recent statements, reflecting conservative parliamentary pushback against escalatory military actions. [FACT] Trump's May 6 announcement of "very good talks" with Iran and the May 6 pause of "Project Freedom" through Hormuz create diplomatic space that reduces immediate incentive for Saudi infrastructure strikes. [INFERENCE] Iran's assessment of Trump's latest proposal suggests a negotiation window that makes costly escalation in Saudi Arabia less attractive. Disconfirmation: IRGC missile launches toward Yanbu or confirmed sabotage of Petroline infrastructure. **H-E2**: "Further IRGC strike on Yanbu/Petroline" — 49-64% (pt=0.59)** [FACT] Iran launched cruise missiles, drones, and weaponized small boats against vessels in recent hours, demonstrating operational willingness to use force. [INFERENCE] Ghalibaf's messaging may not bind IRGC operational commanders if Israel escalates in Lebanon or if US-Iran talks collapse. Disconfirm

PART 4 — TRUTH QUALITY CHECK (TQL) — AI-006 MANDATORY

Part 4 — Truth Quality Check (TQL) **Case E: IRGC/SNSC Constraint on Diplomatic Track** ## Item 1 — Key Assumption **[INFERENCE]** Load-bearing assumption: Khamenei and the SNSC retain veto authority over IRGC escalation timing despite Salami's public rhetoric (May 2026), and Pakistan's May 2026 shuttle diplomacy creates sufficient pause incentive. **Counter-assumption**: IRGC Quds Force operates autonomously on pre-authorized strike plans regardless of diplomatic signals from Islamabad or Tehran's political leadership. ## Item 2 — Fragile Fact **[FACT / INFERENCE hybrid]** Most fragile: Pakistani Foreign Secretary Syrus Qazi's reported May 2026 Tehran visit as *substantive* rather than symbolic. If Qazi delivered only general ceasefire language without concrete Yanbu immunity guarantees, **H-E2** probability rises 8–12 percentage points** as IRGC reads diplomacy as theatre. ## Item 3 — High-Impact Uncertainty **[INFERENCE]** Largest uncertainty: Whether Trump authorized Saudi Patriot redeployment to Yanbu perimeter (unconfirmed

PART 5 — DISCONFIRMATION

CONFIRMS	CONTRADICTS
■ Khamenei or SNSC public statement endorsing Araghchi posture	■ Salami publicly contradicts Foreign Ministry on Hormuz / blockade-lift
■ IRGC announces new vessel seizures or expanded toll mechanism after memo signed	■ Jalili named as alternate Iranian negotiating lead

Disconfirmation Watch: Case E Thresholds [INFERENCE] The **Salami public contradiction** threshold currently poses the highest trigger risk. If IRGC Commander Salami issues statements undercutting Araghchi's diplomatic messaging on Hormuz access or blockade relief terms, hypothesis H-E3 (hardline override) would immediately jump to 50-65%. [INFERENCE] The **largest impact** threshold remains **new IRGC vessel seizures post-memo**. Such action would breach the 0.6 gate and confirm H-E3 outright, signaling that Khamenei has authorized the Guards to pursue coercive escalation independent of Araghchi's diplomatic track. [INFERENCE] No current feed evidence shows imminent triggering of either. The Khamenei/SNSC
